

For Adjunctive Eyelid Relief

Recommend OCuSOFT® HypoChlor™

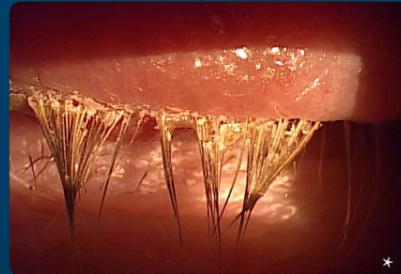

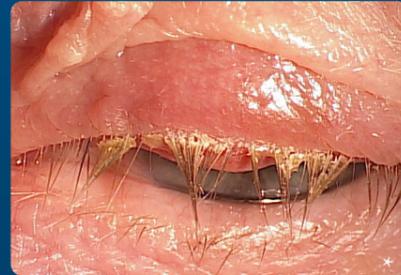

The root cause of anterior blepharitis is the over-secretion of oil in the glands which creates an ideal breeding ground for excess bacteria along with a toxic biofilm on the eyelid.

As a part of the body's natural defense mechanism, Hypochlorous acid is produced by white blood cells that kill, ingest, and break down these pathogenic microorganisms. When combined with a surfactant such as OCuSOFT® Lid Scrub® for removing existing oil from the eyelids, OCuSOFT® HypoChlor® (0.02% Hypochlorous acid) can be an effective addition to your eyelid hygiene regimen in the most severe cases of blepharitis induced inflammation and discomfort.

Both the OCuSOFT® HypoChlor® Solution and OCuSOFT® HypoChlor® Gel formulations are available in a convenient spray pump. In addition, OCuSOFT® HypoChlor® Gel provides a soothing, indefatigable environment to expedite wound healing along the eyelids.

The #1 Doctor Recommended Brand of Eyelid Cleansers

Systematic Approach to Managing **EYELID HYGIENE**

*© Pictures by Paul Karpecki, OD with Koffler Vision Group.

Eyelids are crucial to the health of the underlying eye so the diagnosis and management of eyelid disorders in-office paired with an ongoing eyelid hygiene routine is essential for maintaining healthy eyes. Eyelid hygiene is one of the mainstays in the management of Blepharitis, Meibomian Gland Dysfunction, Demodex infestation and other lid margin related diseases. As the innovators in Eyelid Hygiene, OCuSOFT® is proud to extend its offering of eyelid products to manage all types of eyelid conditions. No matter what the underlying cause, OCuSOFT® has a program with both a recommended in-office treatment and patient take home regimen designed to assist practitioners in providing the highest quality care for their patients with the highest quality products on the market.

Bacterial Blepharitis

Signs and Symptoms

Mild sticking together of the lids, thickened lid margins, and missing and misdirected eyelashes.

Recommended Treatment

In-office procedure: Cleanse eyelids and eyelashes in-office utilizing OCuSOFT® Lid Scrub® PLUS Swabstix™.

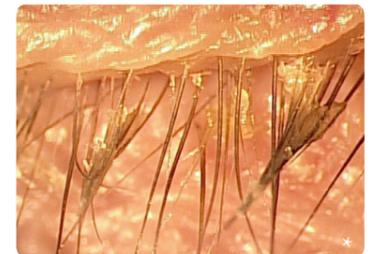

These single-use, disposable, self-saturating Swabstix™ provide convenient in-office use to effectively remove oil, debris, and other contaminants on the eyelids in-office. If necessary, the disposable Gutierrez Blephbrush™ is also available to assist in removing debris.

Take Home Recommendation

OCuSOFT® Lid Scrub® PLUS Eyelid Cleanser or OCuSOFT® Lid Scrub® PLUS PLATINUM Eyelid Cleanser

OCuSOFT® Lid Scrub® PLUS and OCuSOFT® Lid Scrub® PLUS PLATINUM Eyelid Cleansers contain surfactants plus a moisturizer and preservative blend that effectively removes seven different strains of bacteria commonly found on the eyelids. Both offer unique leave-on formulas, so there is no need for rinsing. OCuSOFT® Lid Scrub® PLUS PLATINUM also contains PSG-2™ that mimics the natural lipid layer of the outer epidermis for increased moisturizing throughout the day. PSG-2™ has also been reported to have anti-bacterial and anti-inflammatory properties.

Seborrheic Blepharitis

Signs and Symptoms

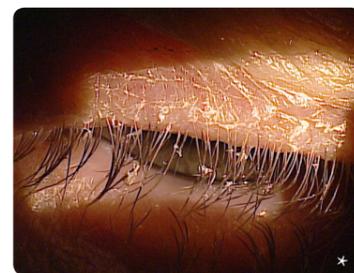

Red, irritated, itchy eyelids and the formation of dandruff-like scales on the eyelashes.

Recommended Treatment

In-office Procedure: Cleanse eyelids and eyelashes in-office utilizing OCuSOFT® Lid Scrub® PLUS Swabstix™.

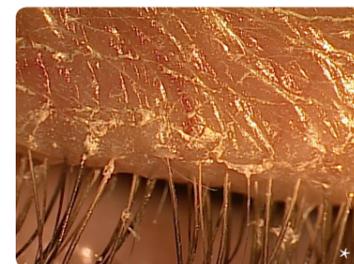

These single-use, disposable, self-saturating Swabstix™ provide convenient in-office use to effectively remove oil, debris, and other contaminants on the eyelids in-office. If necessary, the disposable Gutierrez Blephbrush™ is also available to assist in removing debris.

Take Home Recommendation

OCuSOFT® Lid Scrub® Eyelid Cleanser Original Formula

OCuSOFT® Lid Scrub® Eyelid Cleanser Original Formula is a gentle eyelid cleanser that effectively removes oil, debris, and desquamated skin from the eyelids and is non-irritating to the eyes.

Demodex Infestation of the Eyelids

Signs and Symptoms

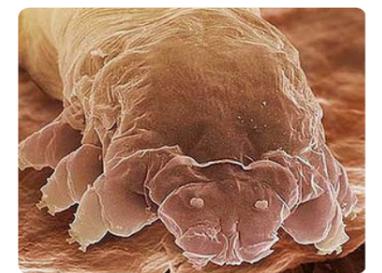

Red, irritated, itchy eyelids and the formation of cylindrical collarettes on the base of the lashes.

Recommended Treatment

In-office procedure: Cleanse eyelids and eyelashes in-office utilizing OCuSOFT® Lid Scrub® PLUS Swabstix™ and Oust™ Demodex® Swabstix™.

Oust™ Demodex® Swabstix™ contain 50% Tea Tree Oil, Sea Buckthorn Oil, and Caprylic Acid. These single-use, disposable, self-saturating Swabstix™ provide convenient in-office use to effectively eradicate demodex and remove oil, debris, and other contaminants on the eyelids. A complete Demodex Kit is available for in-office use.

Take Home Recommendation

Oust™ Demodex® Eyelid Cleansers

Oust™ Demodex® Eyelid Cleanser contains Tea Tree Oil and is mild enough to use on the entire face, including eyelids and eyebrows. Oust™ Demodex® Cleanser also contains a moisturizer and preservative blend that offer anti-bacterial properties. Available in pre-moistened pads or economical foam.
